

Ohio Department of Transportation - Prebid Questions

Project No. 160342

Sale Date - 6/2/2016

ADA-95552 - SR 247-07.41

Question Submitted: 5/24/2016 5:01:52 PM

Plans call for two bridge decks to receive double chip seal and then two course micro. Is that correct?

Yes. Treatment is "Cape Seal", that includes Item 690 Special – Misc.: Bridge Deck Washing, Item 422 Double Chip Seal interlayer with Item 881 Microsurfacing with Warranty, Multiple Course including approaches. In this instance, the double chip seal is being used for adhesion not as a wearing surface.

On page 3 of plans, states that driveways and mail box approaches are to receive microsurfacing. Do we have to go back on roadway/street intersections also?

Although driveways and mail box approaches are to receive microsurfacing, there is no need to go back on roadway/street intersections. Treatment will be 3/8" overlay over most of the project.
