On plan sheet #6 under Item 622 Portable Concrete Barrier, 50", As Per plan, the note states ...the work shall be paid for at the contract price per foot for item 622... Furthermore, CMS Spec Section 614.16 Basis of Payment states that the department will pay for 622 Portable Concrete Barrier under the associated item number. No pay item is included in the bid item summary. Will a bid item be added for the 622 Portable Concrete Barrier, As Per Plan?

I have two questions regarding expansion joint...

First, the dimensions noted on sheet 18 are given as 28' for MC-12x45, and 25'-8.5" for L-7x7x1/2. The dimension chain above indicates length of each would equal 19'-10.25" plus 19'-5 5/16. Would you please clarify? It seems that both angle and channel would measure 39'-3 9/16" each to match the dimension chain.

Also, is it correct to infer from sheet 18 that the top plates for the end diaphragms are all existing and will be reused?
