

# Ohio Department of Transportation Prebid Questions

Project No. 080519

Sale Date - 8/20/2008

---

Question Submitted: 8/8/2008

Question Number: 1

Line Item 0002 calls for Microsurfacing with Warranty, Single Course. Field review of the project segments indicates that several pavements are experiencing rutting in the wheel paths and rutting as you approach several intersections. Single course microsurfacing can not address rutting or restore the cross section or profile of the pavement. To properly restore the cross section and profile of the roadways, a two course application of microsurfacing which would include a leveling and surface course would have to be placed. Would ODOT consider changing the bid item from Microsurfacing with Warranty, Single Course to Microsurfacing Warranty, Multiple Course? This change would allow the cross section and profile to be properly restored and result in a smooth riding pavement. If you have any questions or need additional information, please contact me.
