

# Ohio Department of Transportation - Prebid Questions

Project No. 160105

Sale Date - 3/1/2016

ATH-77719 - US 50-4.99

Question Submitted: 2/24/2016 11:32:37 AM

Can ODOT offer more detail for the partial depth pavement repair of 750 CY, besides being 3" thick? EXAMPLE: will they be longitudinal with driving lanes OR transverse as similar to the full depth rigid pavement? (6 x 24)The production rates are completely different for each application...

**The partial depth repairs shall be 3" deep and the locations will be directed by the engineer after the milling operation has been completed. These repairs will be used to repair transverse asphalt failures above pavement joints or cracks, as well as longitudinal repairs. This quantity can be used for any partial depth repair as directed by the engineer.**
