

Ohio Department of Transportation Prebid Questions

Project No. 090219

Sale Date - 4/15/2009

Question Submitted: 11/21/2008

Question Number: 1

Would ODOT consider changing reference numbers 6 and 9 to class three work zone markings. This is the type of project to use class three markings on since the final product will be completed within 21 days of the work zone markings. This would allow the thermoplastic to burn in better. In addition the edge line reference could probably be deleted. You would be within the 21 day window to install pavement markings so they are really not needed.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
