

Ohio Department of Transportation Prebid Questions

Project No. 100277

Sale Date - 5/6/2010

Question Submitted: 5/3/2010

Question Number: 1

Bid Reference # 21, sign flasher assembly, As Per Plan has a detail on plan page 13 that requires a downlight to be mounted upside down on top of a beacon. The downlight is not designed for this mounting arrangement and would prevent this downlight from being water tight. The same issue was addressed in the previous maintenance contract for district 7 by eliminating the entire bottom beacon assembly. Will an addendum be issued to address this matter?

Bid per plan. District believes this is a biddable and constructible design.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
