In response to the previous question concerning type of pavement marking, is it not true that any type of pavement marking is to be removed per the #881 Specification, #881.04, Part A?

SS881 does not apply to this project. Follow CMS 421.08 for surface preparation requirements.

What is the current pavement marking material on the roadway? There may be a need to remove existing markings prior to microsurfacing depending on marking material.

The existing pavement marking material is traffic paint (per CMS 740.02.)
