

Ohio Department of Transportation - Prebid Questions

Project No. 160075

Sale Date - 2/11/2016

BEL-87193 - SR 7-14.080

Question Submitted: 2/8/2016 4:28:45 PM

Is line 30 for 225CY of Aggregate Base to be used for the ramps requiring profile correction only or is it to be used in the rigid repair areas also? The quantity does not appear to be correct.

Question Submitted: 2/8/2016 3:22:53 PM

in regards to the limits of guardrail removal /replacement the note is vague in the allowable amount to be removed at one time.will the district allow all the guardrail to be removed on the mainline in the closed lane while that lane is closed?

Question Submitted: 2/2/2016 9:52:58 AM

Would 848 Hydrodemolition Surface Preparation be considered to be specified as an alternate to 847 Jackhammer Surface Preparation to prepare the deck for the new MSC Overlay. Over 1/3 of the deck is estimated for Hand Chipping and Hydrodemolition Surface Preparation would be a faster, cheaper method and the service life of the overlay would be extended.

Removal of the wearing course is on the approach slabs, not the deck. Bid the project according the proposal. The District would not oppose letting the Contractor use the 848 Proposal in lieu of the 847 Proposal.
