## Prebid Questions

Project No. 050079

Sale Date - 2/23/2005

Question Submitted: 1/28/2005

Question Number: 1

Page 4/59 states no power operated construction between the hours of 10pm-7am ( CONSTRUCTION NOISE)

Page 7/59 states maintain one lane in each direction 9am-4pm, except one lane two way with flaggers between 6pm-6am.  
(MAINTENANCE OF TRAFFIC)

The one lane two way note conflicts with the construction noise note. Is the designers intent for the Contractor to only use power operated equipment between the hours of 6pm to 10pm? (4 hours per night)

Please confirm which note applies.

**There is no conflict between the notes. The note on Sheet 7 states that one lane in each direction must be maintained during rush hour. (6am-9am) and (4pm-6pm). At all other times you can shut down one lane and use a flagger to maintain traffic. The note on Sheet 4 state that you can not have excessive noise between the hours of 10pm-7am. You will have between 9am-4pm and 6pm-10pm to close a lane without any noise restriction which should be sufficient.**

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
