Prebid Questions

Project No. 080585

Sale Date - 11/5/2008

Question Submitted: 10/22/2008

Question Number: 1

Plan page 5, the center column there is a note regarding construction noise. This note states power operated construction type devices shall not be operated between 9:00pm to 8:00am. On page 8 of the plans the 5th paragraph under "ITEM 614 MAINTAINING TRAFFIC" states lane closures to set up traffic control to implement the traffic control plan can only be done between 9:00pm - 6:00am. These two notes contradict each other. Power operated construction type devices will be required to remove stripes, set and relocate barrier wall, and place temporary markings, all of these items are required to implement the traffic control plan. Please advise. There are also multiple waterline tie ins to be performed. Will CWW allow daytime shut downs of the waterline in order to make these tie ins during the day per the noise policy? Since this is a non-residential area can the noise note be removed?

Question Submitted: 10/22/2008

Question Number: 2

Who is responsible for the concrete testing?

ODOT will do the testing.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
