Prebid Questions

Project No. 060405

Sale Date - 9/6/2006

Question Submitted: 8/10/2006

Question Number: 1

There is a conflict as to what is in the proposal and what is in the plans/drawings for item Ref. number 0078 Item code number 606E60020 Impact Attenuator, Type 2-98 (unidirectional) (75mph, 69" wide). This is what is stated in the proposal.....but the plans/drawings (sheet #14 of 26) calls for a Quadguard model number of #QS6906Y which is not a 75mph system....it's tested out at 100K (aprox. 62/63mgh) and the proper model number if you would like a 75mph system would need to be a model # QS6912Y as per the mfg. design manual....question is what size (speed) system would you like to have installed at this location? Thank you for your help.

Question Number: 2

Line item 0078 Impact Attenuator, Type 2-98 (Unidirectional)(75mph, 69" wide)(WT:36) 1 ea.

Line item 0079 Impact Attenuator, Type 2-98 (Bidirectional)(65mph, 36" wide)(WT:36) 1 ea.

In the General Notes of the plans it list the Quadguard and the Tau-II as applicants for the proposed line items. Is there a reason why the Wide TRACC and Wide FASTRACC are not listed in the plans? Please Advise.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
