Prebid Questions

Project No. 050091

Sale Date - 2/2/2005

Question Submitted: 1/25/2005

Question Number: 1

Regarding Structure BUT-75-0177. The MOT note states lanes can only be closed between 10:00 pm and 5:30 am, 7 1/2 hour duration. The gravity fed resin spec states the resin must set for 6 hours minimum prior to opening to traffic. Assuming it takes 1/2 hour to set up and 1/2 hour to remove the lane closures, this leaves 1/2 hour to remove any markings, power sweep the deck, and apply the resin. Is there a possibility of increasing the duration of lane restrictions on this structure for the resin application operation only? Also, there is no language in this section of the specification for liquidated damages if we exceed the closure limits. Is this the answer to my question?

Question Submitted: 1/25/2005

Question Number: 2

Plan sheet 3, first note says to treat decks with gravity fed resin per the applicable proposal note. There is no proposal note for this work. There is a detailed proposal note for the "modified" work on Union Centre. What spec should we use for the gravity fed resin work on the remaining structures?

There is a "plan note" for Item Special - Sealing Misc: Treating Concrete Bridge Decks with Gravity-Fed Resin (Modified) on plan sheet 3 of 13. There is a "Proposal Note" for Item Special - Treating Concrete Bridge Decks with Gravity Fed Resin (All Structures Except BUT-75-0177) on page 57 of the "Proposal."

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
