Prebid Questions

Project No. 050096

Sale Date - 2/2/2005

Question Submitted: 1/18/2005

Question Number: 1

After review of the signing subsummary I have determined that there are 9- new sign attachment assemblies required not the 74 called for in the pay item. Will the contractor be able to reuse existing sign hangers to mount the new signs or will new hangers be required.

The quantity of Sign Attachment Assemblies noted in the above mentioned plan is based on the replacement of the existing Sign Attachment Assemblies at locations where a new sign is being erected on an existing support or where an existing sign is being removed and reerected. There are 27 locations where this work is to be performed. An Addendum was issued on 12-21-04 to revise the quantity of Sign Attachment Assemblies from 74 each to 77 each due to an added location. We believe that the revised quantity is correct.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
