## Prebid Questions

Project No. 070203

Sale Date - 4/18/2007

Question Submitted: 4/12/2007

Question Number: 1

Sh 9 of the plans indicates a quantity of 16.2 cy of concrete masonry to construct a headwall around a 60" concrete pipe. SD HW1.1 indicates that a headwall for 60" RCP has 11.8 cy of concrete. Please clarify the quantity of concrete. If the quantity is correct, please provide the detail for the headwall.

Question Submitted: 4/7/2007

Question Number: 2

Ref 55 - Plan note on sheet 7, column 3, indicates the existing WZ impact attenuator should be replaced by a contractor supplied WZIA. There is no mention of leaving the contractor supplied attenuator in place at the end of the project. We presume that the contractor will retain ownership of the attenuator, and will be permitted to remove the WZ Impact Attenuator prior to completion.

**The contractor will retain ownership of the Work Zone Impact Attenuator at the end of the project. The contractor shall not remove the Work Zone Impact Attenuator until the slope is repaired and the proposed guardrail is constructed.**

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
