Prebid Questions

Project No. 080630

Sale Date - 11/19/2008

Question Submitted: 9/25/2008

Question Number: 1

The traffic notes require all work to be done in a 7 consecutive day period, during which Requarth Road is closed. Would it be allowable to replace the beam this fall and do the painting work with lane closures of USR 127 next spring? It would not increase the lane closure times for USR 127, they would be delayed until painting is allowed in the spring.

Question Submitted: 9/25/2008

Question Number: 2

Please advise how it is possible to bid line 9 before the contract is let and item 12 is completed. We have previously contacted ODOT on this matter. Our contacts were unable to answer this question. Thanks for your help.

Line item 12, Item 849 Damage Assessment - this is to confirm that the damaged areas are as identified in the plans (with reference to location, extent and character). Line item 9, Item 513 Structural Steel Misc.: Repair of Damaged Members is payment for repairing the damage depicted in the contract documents. If during the completion of the Damage Assessment, additional damage is identified (extent/character/location), then an appropriate repair would have to be added to Line 9 via change order. The majority, if not all of the items/areas that need to be inspected have already been identified in the plans. The contractor shall base his bid upon the work detailed in the plans and the observations from his Examination of the Site of Work (CMS 102.05).

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
