## Prebid Questions

Project No. 050459

Sale Date - 8/24/2005

Question Submitted: 8/10/2005

Question Number: 1

The plans call out the use of 448 type 1h and 448 type 2 pg64-28 for use in a park. Is ODOT sure it wants to use a heavy mix design on park roadways? Normally, park roads normally use a light mix design. We can easily see a need for medium mix design. Heavy design seems to be overkill.

**The Hamilton County Engineer wants heavy mix design. He has requested heavy mix on all his park jobs.**

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
