Prebid Questions

Project No. 040538

Sale Date - 11/3/2004

Question Submitted: 10/14/2004

Question Number: 1

Per page 102, of CMS 2002 all existing pavement must be removed prior to placing embankment. Does this apply to this project? If so, then the excavation quantity would be off by as much as half.

Secondly, does all embankment that is granular in nature (ie. gravel/sand/sandstone) have to come from a Supplement 1069 Prequalified Aggregate Supplier? More specifically would granular materials from a un-prequalified Aggregate Supplier be allowed as embankment on an ODOT project?

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
