Prebid Questions

Project No. 103013

Sale Date - 6/3/2010

Question Submitted: 5/26/2010

Question Number: 1

Will ODOT allow alternate superstructure types to replace the concrete slab?

Proposed superstructure shall be concrete slab, as scoped. No addendum required.

Question Submitted: 5/26/2010

Question Number: 2

Will ODOT consider allowing the use of cross overs to complete the construction more economically?

Cross overs will not be allowed. No addendum required.

Question Submitted: 5/27/2010

Question Number: 3

Attachment B, Page 33 of the SOS tends to indicate a flexible approach pavement whereas the typical sections of the original construction drawings indicate a rigid pavement. The existence of the rigid pavement at the intended position of the pressure relief joint would require removal and replacement of the rigid pavement per the current SCD BP-2.3. Please advise.

Answer will be included in an addendum.

Question Submitted: 5/27/2010

Question Number: 4

1) Can ODOT provide the existing drawings for the asphalt overlay project or provide us information for the asphalt overlay composition and thickness? 2) The SOS does not require the contractor to perform subsurface utilities engineering per section 12.3. Page 5, line 23 of the prebid meeting minutes states that this is an element that is required as part of this work. Please clarify.

An addendum will be sent to answer the questions below.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
