## Prebid Questions

Project No. 080484

Sale Date - 8/6/2008

Question Submitted: 7/21/2008

Question Number: 1

Please clarify the full depth repair note. Is the intent of the plan to use hydro demolition to perform this removal? If so when will we be required to start the hydro demolition the bridge deck patching item set up does not require hydro demolition. The patching quantity and full depth repair quantity do not agree with each other. If all the patching quantity on this structure required full depth repair you would need a minimum quantity of 520 sy of deck patching. If this full depth repair is in one location what is going to support the hydrodemolition equipment. If this full depth repair is located over the RR tracks does ODOT have any agreements with the RR. We do not think it is possible to do this work on one weekend. Will ODOT determine the full depth areas before the start of the weekend so the contractor can make arrangements as to materials needed to support this full depth?

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
