Question Number: 3

The plan note for item 251 – Partial Depth Pavement Repair on sheet 4/18 refers to repairing deteriorated areas with 3 inches +/- of 448 asphalt concrete type 2. As is typical, this item is to be performed after the completion of mainline pavement planing (unless otherwise directed by the engineer). The plan note on the same sheet 3/10 regarding item 254 Pavement Planing, Asphalt Concrete, As Per Plan states that the depth of planing shall vary (2 inches or to the top of existing brick whichever is first). Is it the Department's intent to perform 3 inch partial depth repairs in all of the following circumstances? •3 inches into a 4 inch course of brick •3 inches into areas where there are 3 inches +/- of asphalt pavement remaining after pavement planing •3 inches into areas where concrete is the underlying section of a composite pavement.

EBS Amendment number 002 has been posted for this project. However, there is not an EBS Amendment number 001 for the project. Is there an EBS Amendment document missing?

**I loaded the amendment and verified that it's on OUR site. Also, in the event that there are missing files out on our web site all of the EBS files and amendments should also be on Bid Express for download.**
