Prebid Questions

Project No. 080551

Sale Date - 9/24/2008

Question Submitted: 9/11/2008

Question Number: 1

As I understand the plan note, all excavation is to be included in the Dump Rock Fill items. Can you clarify how much rock excavation is required for the shear key as detailed in the sections? It is unclear from the borings and sections and this excavation could take quite a bit of time without blasting. Is the rock excavation 4' at the base and 8.5' at the top of the 11' cut or is it just the 4' by 2' height for the rock excavation? Thanks.

The plans include the best available boring information. As specified in the plans, all excavation including excavation for shear key into rock is to be included in the Dumped Rock Fill items. Use the plans to prepare your bids.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
