## Prebid Questions

Project No. 066018

Sale Date - 7/12/2006

Question Submitted: 7/5/2006

Question Number: 1

On page 3/15, Item 614, Maintaining Traffic: The sentence states that "A minimum of one lane of traffic in each direction shall be maintained at all times by use of the existing pavement." Due to the construction widths required for both truck and track-mounted drill equipment, it is not practical to maintain one lane of traffic in each direction during construction.

Should an addendum be issued addressing traffic control in accordance with Standard Construction Drawings MT-96.10 or MT-97.10?

Question Submitted: 7/7/2006

Question Number: 2

On sheet 6/15, is the "EX. GROUND @ CENTERLINE" in reference to the centerline of S.R. 285 or the centerline of the 6" underdrain?

If the profile is for S.R. 285, shouldn't a plan and profile for the 6" underdrain be provided?

**On sheet 6/15, the "EX. GROUND @ CENTERLINE" is the centerline of SR 285. Since at station 611+70.54, 613+35.74 and 614+38.39 there is offsets and flow line elevations for the 6" underdrain, we think here is sufficient information to construct the underdrain**

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
