Prebid Questions

Project No. 060292

Sale Date - 6/21/2006

Question Submitted: 6/16/2006

Question Number: 1

The bid documents call for temporary pavement markings to be class one. Would the district consider class two markings? The average daily traffic count on this road is low and class two markings are usually installed on 4 lane rural roads. With the specification change in class one markings to include the data logging systems the price on these items will out weigh their value.

The District wants to use the Class one markings as specified in the bid documents.

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
