Prebid Questions

Project No. 070041

Sale Date - 1/24/2007

Question Submitted: 1/11/2007

Question Number: 1

With reference to Plan Sheet 141, the plan shows permanent sheet piling to be installed across the inlet and outlet ends of the proposed culvert. Note "A" on this drawing states that said sheeting is to be driven 26-feet below the bottom of the proposed footing. However, there is no indication as to the elevation of the top of the sheeting after installation. Please indicate the elevation of the top of the permanent sheeting after it is installed. In addition, does the phrase "bottom of the proposed footing" refer to the spread footing bottom or the bottom of the cut-off wall attached to the footing? If it is not too much to ask, what is the purpose of the permanent sheeting so indicated?

If it is not too much to ask, what is the purpose of the permanent sheeting so indicated?

Question Submitted: 1/15/2007

Question Number: 3

Page 8 of the plans under "Plan note for projects over a sole source aquifer" does not allow refueling from sta. 47+50 to the east end of the job. On page 10 of the plans under "environmental notes" refueling is not allowed from sta 45+00 to the west end of the job. In phase 1 the only place we can refuel is in the middle of an intersection, in traffic. This note will require a lot of extra costs to move equipment to this specific spot every day, or off the job, and will be a safety concern since equipment will need to be moved in and out the work zone every day. Could you reconsider these 2 notes, as was done on Project 414-06?

Question Submitted: 1/15/2007

Question Number: 4

Page 3 of the plans, for Reference "A" on the left side of the page it states "Existing pavement, see plans for thickness" It does not appear that the thickness is provided in the plans. Could you verify the thickness and make-up of the existing pavement?

Question Submitted: 1/16/2007

Question Number: 7

Can we get drawings for the existing bridge?

Available at <ftp://ftp.dot.state.oh.us/pub/contracts/plans/070041/>

Question Submitted: 1/16/2007

Question Number: 8

This project involves pavement widening work on both sides of a R/R crossing at station 64+65. The plans do not reference any work to be done on the crossing itself. Who will construct the R/R crossing? Will this work be performed during the project phasing?

Question Submitted: 1/16/2007

Question Number: 9

Can we get drawings for the existing bridge?

Available at <ftp://ftp.dot.state.oh.us/pub/contracts/plans/070041/>

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.

Question Submitted: 1/2/2007

Question Number: 11

Bid item 82 609 Curb, Type 6 7685 FTThe plans do not count the curb at the median island on sheets 85 and 86. That would add around 1000 Feet to the bid item. I also digitized the other pieces of curb and come up with about 9000 total ft for the job, including the curb at the median.
