Prebid Questions

Project No. 070532

Sale Date - 12/12/2007

Question Submitted: 12/4/2007

Question Number: 1

The info provided to the jprebid question about additional geotechnical info was for a project which was in Springboro and is not pertinent. Is there additional info? Also, is the rock excavation for the headwalls associated with the 180" tunnel liner plate (Concrete Masonry) to be paid under the structure excavation items given (separate dirt and rock items) or should there be additional structure excavation items for this work. It appears the the items given are meant to be associated with the Box culvert by the way they are presented in the summary in the plans, but no other structure excavation item is provided in the tunnel structure.

A1: The bidder is correct that the information posted is incorrect. That information has been removed and replaced with the correct information. A2: Per the Construction and Material Specifications, 602, excavation for the half-height headwalls is included for payment with the 602 Concrete Masonry bid item. No additional items are needed in the plans.

Question Submitted: 12/4/2007

Question Number: 2

Is there any additional geotechnical reports for this project or any specs?

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
