## Prebid Questions

Project No. 050319

Sale Date - 5/25/2005

Question Submitted: 5/16/2005

Question Number: 1

The new pavement section for the SB outside shoulders that is required to be built during phase 1A needs to be performed during off peak hours. Traffic maintenance notes refer to page 73 for details of the drop off treatment in workzones. However, at no time is the drop off one foot away from the traveled lane as described in column one of the drop off table on sheet 73. What is the drop off treatment when the drop off is zero feet away from the edge of pavement? Also, detail A on sheet 9 shows milling to a depth of 3" into the existing pavement one foot. What is the drop off treatment when work is in the travel lane?

Question Submitted: 5/18/2005

Question Number: 2

We are confused on what you want in the median as shown on sheet 25. Two questions/comments:

- (1) If there are just to be two double rows of pavers on each side of the median, we come up with a much smaller quantity of concrete pavers than the plans show.
- (2) Is it your intention that all "imported" dirt required to raise the center of the median to the desired cross-section be topsoil?

Question Submitted: 5/19/2005

Question Number: 3

Ref. No.14 - Luminaire, Decorative, APP repeats itself on Ref.No.24 - Luminaire, Decorative, APP  
Is this correct?  
Ref.No.27 is the alternate luminaire

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
