Prebid Questions

Project No. 080580

Sale Date - 10/8/2008

Question Submitted: 11/3/2008

Question Number: 1

Can you please define what Item Number 630E09000, Breakaway Beam Connection is made up of or what the bid should cover? Is it the lower support beam and a base plate? Thank-you.

Please refer to Standard Construction Drawing TC-41.10. The break-away details are shown in this standard drawing.

Question Submitted: 11/4/2008

Question Number: 2

Ref. Numbers 14 through 17 have been established for the preparation and painting of two cantilever sign structures and two overhead span structures. The painting specifications call for separate payment for the arms and uprights. Therefore if the arm and upright of the cantilevers are both to be painted, then a quantity of 2 should be established for each structure. The two span structures require a pay quantity of two (per structure) if only the uprights get painted, or a pay quantity of three if the overhead truss also gets painted. Since the painting of the overhead truss requires lane closures, it should be identified if it is also to be painted, since the truss painting is substantially more expensive. Please advise if the quantities will be increased to 8 each (or 10 each if the trusses are painted).

All prospective bidders, subcontractors, suppliers, materialmen and all others who have an interest in these prebid questions and answers are advised that these items are being provided for informational purposes only and are not part of the bidding documents. If a question warrants a clarification, the Department will issue an addenda addressing the request for clarification to all plan holders. If the Department believes that the bidding documents adequately address the request, the contractor will be advised accordingly.
