

Inspector Testing for Flexible Pavements, Advanced Structures, Compaction Testing and Traffic Work Zones

2021 – Page 1 of 2

Description – The Ohio Department of Transportation’s [Division of Construction Management](#) provides Construction Inspector Testing in the following four subject areas:

- Flexible Pavements Test
- Advanced Structures Test
- Certification for Compaction Testing
- Traffic Work Zone Test *(NOTE: This test is for construction inspectors only and is NOT for Worksite Traffic Supervisors (WTS) prequalification.)*

New Testing Protocols – Please see the information below and on page 2 of this flyer regarding important updates and safety protocols due to the COVID-19 pandemic.

Testing Dates and Times – Inspector Testing dates are added to the schedule periodically. There is typically an option to choose either a morning or afternoon session (9:00 to 11:00am, or 1:00 to 3:00pm). **Due to limited space as a result of social distancing requirements from COVID-19, you will be limited to registering for one available testing day per month (you may register for both sessions within one day).**

Registration Information – All test takers **MUST** be pre-registered. Space is limited due to social distancing requirements. Any person who arrives without being pre-registered for testing will be asked to leave. Do not plan on taking the exam multiple times unless you have registered for both an AM and a PM testing spot. Additional time is needed between testing sessions to thoroughly sanitize the test room.

Please visit <https://ltap.enrollware.com/schedule> to access the online registration system. Select **Inspector Testing** from the Schedule page:

Inspector Testing for Flexible Pavements, Advanced Structures, Compaction Testing and Traffic Work Zones

Then scroll down to select one of the **available sessions highlighted in green font** to proceed.

Inspector Testing for Flexible Pavements, Advanced Structures, Compaction Testing and Traffic Work Zones

Testing Location: ODOT Computer Training Room,
1616 W. Broad St., Columbus OH 43223
Equipment Training Office at ODOT Test Lab Complex

[Click here](#) to visit the Division of Construction Management webpage. [Click here](#) to see *Construction Inspector Testing and Prequalification FAQs*. If you have questions about the registration process: ltap@dot.ohio.gov or (614) 387-7359.

Additional Information – Based on the Urgent Health Advisory for Ohio due to the COVID-19 pandemic, please note the following updates and safety protocols for all upcoming sessions of Construction Inspector Testing.

Please bring with you:

- Face mask/covering
- Government issued photo identification card
- Non-programmable calculator (item intended and designed to be used only as a calculator)
- Pen or pencil
- Your MyODOT username and password

Under the new safety protocols due to the [COVID-19 pandemic](#), attendees are still NOT permitted to bring reference materials or spec books into the testing site. As with previous sessions, a supply of reference resources will be available on-site to borrow during testing, such as the ODOT Construction & Material Specifications, Manual of Operating Procedures, Standard Construction Drawings and Supplemental Specifications. Inspector applicants are expected to have knowledge and will be tested on items from the applicable resource publications for each subject area. No cell phones, tablets or laptops will be allowed. *No calculators, pens or pencils will be available for loan due to the COVID-19 pandemic. Failure to bring these items with you means you will have to take the test without them.*

Everyone registering to complete an exam MUST have applied for and obtained a MyODOT username and password and must bring both with them to the test in order to login to the online testing system at the ODOT Computer Training Room. The instructions on how to obtain your MyODOT username and password are available at this link: [How to Obtain a MyODOT Username and Password](#).

*Failure to have obtained your MyODOT username and password ahead of time **WILL** result in being rescheduled to take the exam another day.* Please obtain your MyODOT credentials at least four days before the testing date.

Please note the following summary of protocols for testing:

1. Face mask/covering is required
2. Temperature will be taken at door
3. No materials will be brought into testing site
4. Must have ID (official state or federal)
5. Bring your own calculator (non-programmable)
6. Bring a pen or pencil
7. Maintain social distancing of at least six feet
8. No gathering in the building (inside); must leave when testing is completed
9. You must have your MyODOT username and password to be tested (must be obtained before the testing day).

If you are sick or not feeling well, or if you have any reason to believe you have been exposed to the coronavirus: please DO NOT show up at the testing site, and DO NOT attend the testing session.
