

# Work Type 57 Concrete Sealer Training – Online Course and Test

This online course (eLearning) is about the sealing of concrete surfaces. Included is information on the best application practices to achieve optimum performance of the sealers. This training goes beyond the recommendations given in sealer technical data sheets by giving explanations as to what will result when technical data sheet recommendations are not followed.

Discussion topics include: Ohio DOT specification item 512.03, material storage, mixing, proper application equipment, pot life, surface preparation, surface profile, rate of application, containment.

## Who Should Complete This Training?

Anyone who will be at the job site to oversee the sealer application processes is required to take the online course and pass the test (exam) **every 4 years**. Please refer to [ODOT's Consultant Prequalification Training and Certification List](#) for additional information.

The online training consists of one module that takes about 45 minutes to complete. Once you successfully complete the module, you may proceed with the online test.
