Issue 39

Walk.Bike.Ohio wants to hear from you!

ODOT has launched the planning process for Walk.Bike.Ohio. The plan will guide Ohio's bike and pedestrian policies and investments in infrastructure and programs.

We need your help to get as many people as possible involved from around the state. Read on to learn how you can help shape the future of walking and biking in Ohio.

Get Involved!

ODOT needs your help to extend outreach and make sure the plan reflects the needs and interests of the entire state. You can help as an individual and/or as a practitioner by:

Take and share the survey

Provide feedback on your own personal walking and biking habits in the online survey, and share the [survey link](#) with your network:

<https://www.surveymonkey.com/r/WalkBikeOhio>. The survey will be open through **August 31**.

Spread the word

- Use the already-prepared [press release](#) to contact local press outlets or to share information in your own organizational newsletter.
- Share links to the project [website](#) and survey on all your social media channels. You can copy and paste this sample Facebook post: *Take ODOT's survey on walking and biking in Ohio. Share your thoughts by 8/31.*
<https://www.surveymonkey.com/r/WalkBikeOhio>

Facilitate a vision, goals and barriers/opportunities exercise:

Do you have a meeting scheduled between now and August 31? ODOT has prepared meeting-in-a-box materials to help practitioners around the state facilitate group exercises with transportation practitioners and partners.

Activities include:

- An overview presentation
- A visioning exercise
- A goals ranking exercise
- A discussion around barriers to walking/biking and opportunities to address them

This could take 15–60 minutes depending on how many exercises you facilitate. Please contact statewide.planning@dot.ohio.gov for materials and guided instructions.
