

SR 15 / CR 169 INTERSECTION IMPROVEMENTS HANCOCK COUNTY

Pre-Recorded Online Presentation

You are invited to watch an online pre-recorded presentation by the Ohio Department of Transportation regarding a proposed project that would improve safety at the intersection of State Route 15 and County Road 169 in Hancock County by removing access to State Route 15 and constructing an overpass bridge.

The purpose of the project is to improve safety at the intersection for the traveling public while providing appropriate access to the State Route 15 corridor for local residences, businesses, and future developments.

The need for this project arises from a history of crashes at the crossing of State Route 15 and County Road 169. Addressing safety at this crossing will reduce the potential for crashes and the likelihood of severity.

The online presentation will explain the overall proposed project and present the initial design. The intention of the presentation is to introduce the project and gather community input. The presentation and all materials regarding the project will be available beginning September 1, 2021 and will remain for an indefinite time. Individuals without computer access can request a transcript or hard copy of the presentation.

Please complete and mail the comment form provided, or you may submit comments online through the project website, transportation.ohio.gov/Hancock169, or to the contact below.

Please submit comments by October 1, 2021.
