

ALL-30-16.19 (PID 111375) - U.S. 30 PROPOSED INTERSECTION SAFETY IMPROVEMENTS ALLEN COUNTY STAKEHOLDER INFORMATION

You are requested to provide feedback on a proposed project to upgrade the safety of three intersections along the U.S. 30 corridor in Allen County. A prerecorded, online presentation explaining the project will be available for view on July 29, 2020 and will remain thereafter on the project website: www.transportation.ohio.gov/Allen30Thayer.

The prerecorded, online presentation will explain the overall proposed project and present the proposed design at each location. At Mayberry Road and Cool Road, cul-de-sacs will be installed removing direct access to U.S. 30. An RCUT will be constructed at Thayer Road. See the exhibits above. For more information on RCUTs, please visit: www.transportation.ohio.gov/wps/portal/gov/odot/about-us/resources/rcut-intersections

The purpose of the project is to control access and improve safety at three intersections along U.S. 30 in Allen County. These locations were identified for improvement based on several factors, including traffic volumes and crash data.

We look forward to receiving your feedback!

Please complete and mail the comment form provided, or you may submit comments online through the project website, or to the contact below. Please submit comments by August 29, 2020 to:
